

# Emerald Ash Borer Look-Alikes

There are many bright metallic-green insects in Nebraska, but the emerald ash borer beetle is only a half-inch long and strictly associated with ash trees.

Produced as a cooperative effort by University of Nebraska-Lincoln Extension, Nebraska Department of Agriculture, Nebraska Forest Service, and USDA-APHIS.

University of Nebraska-Lincoln Extension educational programs abide with the non-discrimination policies of the University of Nebraska-Lincoln and the United States Department of Agriculture.
